

Welcome to the Homewood campus of Johns Hopkins University. Since you were unable to attend one of our guided tours, we hope this brochure will serve as a good substitute. This tour will give you a glimpse into life on campus—where Johns Hopkins students live, work, study, and play—and will convey to you the range and diversity of educational opportunities available to Johns Hopkins undergraduates. * Johns Hopkins was founded in 1876 as America’s first research university. Today the 140-acre Homewood campus houses the Krieger School of Arts & Sciences and the Whiting School of Engineering. * Although undergraduates take most or all of their classes in these divisions here at Homewood, Johns Hopkins is made up of 10 separate divisions, all of which afford students ample opportunities for study or research. The other eight divisions of Johns Hopkins are the Peabody Institute, the first conservatory of music chartered in the U.S. and part of Johns Hopkins since 1977; the School of Medicine; the Bloomberg School of Public Health; the School of Nursing; the Paul H. Nitze School of Advanced International Studies in Washington, D.C.; the Applied Physics Laboratory; the School of Education; and the Carey Business School.

THE TOUR BEGINS in the lobby of Mason Hall, opened in fall 2007 and home of the Office of Undergraduate Admissions and the university’s visitor center. From Mason Hall, cross the Decker Quadrangle to Garland Hall, the primary administrative building on campus. Located here are the offices of Student Financial Services, the Registrar, Student Accounts, and Academic Advising, as well as the Career and Counseling centers.

LEVERING 5 Cross through the lobby of Garland and exit the other side. Look to the right and follow the curving path onto Levering Plaza—the wide brick patio in front of Levering Hall, the student union. At the beginning of each academic year, a

Student Activities Fair is held here, an opportunity for students to learn about and join any of the more than 360 clubs, activities, and organizations offered on campus. Levering Hall houses large spaces for special events, Arellano Theater, the HopStop student club, Pura Vida Organic Coffee, the Office of the Dean of Student Life, the Center for Social Concern, and Levering Food Court, a popular lunch spot. A student lounge is just inside the front doors.

From Levering Plaza, turn right and follow the brick paths onto the Wyman Quadrangle, also known as the Lower Quad. On your right sits Latrobe Hall, home to the Civil Engineering and Mechanical Engineering departments. Continue past Latrobe to

Barton Hall, where Electrical & Computer Engineering resides. At the foot of the quad, you’ll see Shriver Hall, which houses the largest auditorium on campus. Students visit Shriver to hear the Hopkins Symphony Orchestra and to enjoy movie screenings, symposia speakers, comedy shows, concerts, and other special events. Following the quad past Shriver and continuing up the other side, you’ll see Shaffer Hall. Attached to the back of Shaffer is

the New Engineering Building, containing the administrative offices of the Whiting School of Engineering. Between Shaffer and Maryland halls, at the bottom of the steps, sits Whitehead Hall, where the

Department of Applied Mathematics & Statistics, the Center for Leadership Education, and the Office of Summer and Intersession Programs reside. Maryland Hall houses the departments of Chemical & Biomolecular Engineering and Materials Science & Engineering.

Writing Seminars

24-hour computer lab, the Mathematics Department, the Cognitive Science Department, the Language Teaching Center, and the Krieger Mind/Brain Institute. On your left is Ames Hall, home to the departments of Psychological & Brain Sciences and Geography & Environmental Engineering.

At the top of the stairs, take a left. You are now on the Keyser

AMES 15 Quadrangle, also known as the Upper Quad. Before you, at the head of the quad, stands Gilman Hall, one of the academic and social hubs on campus. Gilman is home to the humanities departments, including the departments of German & Romance Languages & Literatures, History, English, Near Eastern Studies, and the Writing Seminars. A major renovation to Gilman was recently completed, featuring the refurbished “Hut,” a 24-hour undergraduate library/study area, the Johns Hopkins Archaeological Collection, an open atrium area, and the great seal of the university. (Students are cautioned not to step on the seal for fear of not graduating.)

Continue around the quad past Gilman. On your left, you will pass Mergenthaler Hall.

Mergenthaler houses a number of departments, such as Economics, Sociology, History of Art, and Political Science, which includes the International Studies program. Also in this building are the administrative offices for the Krieger School of Arts & Sciences. Attached to the back of Mergenthaler is Jenkins Hall, which houses the Biophysics Department.

Just past Mergenthaler is Remsen Hall, which is the original home of the Chemistry Department. The building is named after Ira Remsen, the second president of Johns Hopkins. Remsen is best known for his participation in the discovery of saccharin in 1878. His ashes are interred behind a plaque in the building.

To the right of Remsen, at the foot of the quad, sits the Milton S. Eisenhower Library. The library was built in 1964 when the university’s holdings became too large for the original library in Gilman. So that its

bulk would not dwarf the other buildings on campus, four stories were built underground. The library currently holds roughly 2.9 million volumes, 55,000 print and electronic journals, 216,000 maps, more than 10,000 videos and DVDs, 4.2 million microforms, and significant rare books, manuscripts, and archival resources.

Enter the library, walk down one set of steps, and exit through the doors at the foot of the stairs (a Johns Hopkins ID card is needed to

go past the security desk). You should now be facing “the Beach,” a large lawn sloping down the hill to N. Charles Street. During the warm months, students gather here

in droves to socialize, sunbathe, and play Frisbee.

From the library, turn right and continue down the path (descend the steps) to the courtyard of the Mattin Center. This complex is dedicated to the arts, and features the Swirnow Theater, the Digital Media Center, art studios, a dance studio, darkrooms, and music practice rooms, as well as spaces for student groups to gather and the Silk Road Express café. Just behind the Mattin Center (past the covered breezeway), you’ll find the historic Merrick Barn, once part of the original Homewood estate of the Carroll family and now home to the theatre arts & studies program minor.

Continue through the courtyard and out onto N. Charles Street. Across the street, you’ll see Charles Commons, a residence hall complex and dining facility. The Barnes & Noble Johns Hopkins bookstore is located here. Turn left and walk up N. Charles Street. Across from the circular drive in front of the library, you’ll see Wolman and McCoy halls, two residence halls. Wolman Hall’s claim to fame is that—in its days as an apartment building—Zelda and F. Scott Fitzgerald lived there for a time.

Ascend the set of steps just past the end of the circular drive. To your left is Homewood Museum, one of the finest surviving examples of Federal period architecture. Homewood—the building from which the Homewood campus gets its name—was a wedding present from Charles Carroll of Carrollton (1737–1832), one of four Maryland signers of the Declaration of Independence, to his only son, Charles Carroll Jr. The house was restored by the university and

opened to the public in 1987. Ahead of you and to your right stand the Alumni Memorial Residences, an area informally known as the Freshman Quad. As the name implies, freshmen are housed in these residence halls, which feature traditional double and single rooms. Each of the two complexes is subdivided into “houses” of 30 to 40 students. Social events, activities, and intramural sports teams are often organized by house. At the far end of the Freshman Quad sit Buildings A and B,

featuring suite-style living, with a cluster of single-sex rooms sharing a bathroom. Fresh Food Café, the freshman dining hall, is located between Buildings A and B. Freshmen and sophomores are required to live in university housing. Juniors and seniors choose between university-owned housing or privately

WOLMAN 26 housed in these residence halls, which feature traditional double and single rooms. Each of the two complexes is subdivided into “houses” of 30 to 40 students. Social events, activities, and intramural sports teams are often organized by house. At the far end of the Freshman Quad sit Buildings A and B, featuring suite-style living, with a cluster of single-sex rooms sharing a bathroom. Fresh Food Café, the freshman dining hall, is located between Buildings A and B. Freshmen and sophomores are required to live in university housing. Juniors and seniors choose between university-owned housing or privately

owned housing. Most students live within three blocks of campus. Further up N. Charles Street, opposite the residence halls, is the Bunting-Meyerhoff Interfaith and Community Service Center, which houses Campus Ministries.

Proceed along the path, keeping the AMRs, then Buildings A and B, on your right. At the far side of the Freshman Quad, turn right and head up the hill. At the top of the path, you'll find the Newton H. White

Athletic Center and the Ralph S. O'Connor Recreation Center. The Rec Center, open to all students, includes basketball, volleyball, and squash courts; a running track; a weight room; a cardiovascular fitness room; a climbing wall; and space for fitness classes. The Athletic Center contains the swimming pool and facilities dedicated to the training of varsity athletes. Next to the two centers stands Homewood Field, home to the Johns Hopkins Blue Jays. Johns Hopkins offers 20 Division III teams, plus Division I men's and women's lacrosse. The men's team won the 2007 NCAA national championship. Behind the Athletic Center sits the ROTC building, housing one of the nation's oldest Army ROTC programs.

Turn left and follow the curving paths through the Bufano Sculpture Garden. At the bottom of the hill, just past the gazebo, you'll see the path leading to the Bloomberg Center for Physics and Astronomy on your right. The largest building on campus, Bloomberg houses the Department of Physics and Astronomy. Beyond Bloomberg, across San Martin Drive, are the Space Telescope Science Institute (STScI) and the San

Martin Center. STScI is the astronomical research center responsible for operating the Hubble Space Telescope as an international observatory. Many of the scientists at STScI also teach at Johns Hopkins. The San Martin Center houses adjunct Johns Hopkins research facilities.

Continue to the flight of stairs at the bottom of the hill. As you ascend,

you'll see Mudd Hall on your left, home of the Biology Department, and the Chemistry Building on your right. At the top of the stairs, you'll find Macaulay Hall on your left, where the Anthropology Department is located. On the far side of Macaulay stands Dunning Hall, a newly refurbished classroom building and the home of the undergraduate tutoring program, the Learning Den. Turn right opposite Macaulay and follow the tree-lined path. On the other side of the path, you'll come to the Decker Gardens. The building to the right of the fountain is the Johns Hopkins Club. At the far end of the gardens is Nichols House. Previous President William R. Brody was the first university president to reside here since 1972. Today, President Ronald J. Daniels keeps the tradition by residing there. To the left of the garden

sits the "Greenhouse," which contains the Writing Center and the Program in Latin American Studies.

Continue down the road between the back of Gilman and Levering halls and the Greenhouse.

Through the wooded area on your right and across San Martin Drive is Olin Hall, which houses the Earth & Planetary Sciences

Department. Beyond the path to Olin sits Hodson Hall, a classroom building containing state-of-the-art classrooms, a 500-seat auditorium, the trustee boardroom, and the Hodson Trust Archives. Just past Hodson stands Clark Hall, the Biomedical Engineering Department's home. Across the quad from Clark Hall, you'll see Hackerman Hall. At the head of the quad sits Mason Hall, where you began your tour. On the other side of Mason, across Wyman Park Drive, you'll find the Wyman Park Building, which houses Printing Services and additional administrative offices.

Johns Hopkins University is committed to recruiting, supporting, and fostering a diverse community of outstanding faculty, staff, and students. As such, Johns Hopkins does not discriminate in any student program or activity administered by the university or with regard to admission or employment.
