## Dimensions of the Nonprofit Sector, Volume Two

Lester M. Salamon, S. Wojciech Sokolowski, and Associates

368 pages / August 2004  
US \$39.95 / Paper: 1-56549-184-X

Volume Two of *Global Civil Society* continues the comprehensive overview of the scope, size, composition and financing of the nonprofit, or civil society, sector in the developing as well as the developed world.

Challenging many conventional beliefs about the civil society sector, it demonstrates, for example, that this sector engages a much larger labor force than ever before imagined, even in the developing world. It shows that gifts of time are far more important to the economic and social impact of this set of institutions than are contributions of money. And it underlines the critical role that government plays in the financing of nonprofit institutions.

This book will be a crucial source of information on the nonprofit sector, and essential reading for nonprofit and foundation leaders, international development agency officials, and public policy makers. It will also be a key reference tool for libraries. The data are presented in an easily accessible style, with numerous charts and tables.
