

## **Manager of Eukaryotic Tissue Culture Facility**

The position of manager of a eukaryotic tissue culture facility is available at Johns Hopkins University, School of Medicine. Duties will include maintenance and storage of cell lines and expression plasmids, stocking and maintaining the facility, creation of transfected cell lines, large-scale production of cells or conditioned medium, consultation with users, and user training and supervision. Opportunities for scientific collaborations may arise when mutually acceptable. A bachelor's degree in a relevant field and experience with the culture and transfection of mammalian and insect cells is required. The ability to interface with a wide variety of users is also essential. Please direct inquiries to Cathy Kates, [ckates3@jhmi.edu](mailto:ckates3@jhmi.edu).
