

U.S. News and World Report's top ranked Division of Geriatric Medicine & Gerontology on the Johns Hopkins Bayview Medical Center campus has **Postdoctoral Positions** available.

2- to 3-year funded positions for Ph.D.s interested in applying basic scientific approaches to aging research.

Our faculty apply genetic, molecular, and transgenic approaches to study:

- Frailty
- Muscle/bone structure
- Immunity
- Erythropoiesis
- Apoptosis & Necrosis
- Biochemical switches & tumor progression
...in older adults

We'r

It is expected that all applicants to be within a few months of successfully defending their PhD thesis (that is, in the process of writing up their thesis work). Because of the restrictions of the T32, this person must be a US citizen or have their "green card".
