

Technical Support Consultant, Life Science Products, Bio-Rad

Location: Waltham, Massachusetts

Utilize your science background and experience while gaining valuable on-the-job training in our business activities. Successful candidates possess a strong desire to help others and are detail-oriented, curious and good problem solvers. Job satisfaction comes from simultaneously helping customer achieve their scientific goals while helping the company to create higher quality products. The position is a perfect entry into the company, and serves as an excellent transition from academia to business.

Education: Advanced degree in a Life Science discipline or equivalent education and experience. Ph.D. a plus.

Experience:

- Five to ten years related experience in a laboratory research setting, industrial R&D group, or equivalent.
- Teaching, service or support experience a plus.
- Experience with molecular biology, PCR and quantitative PCR, lab and/or process scale chromatography, protein purification applications and methods, imaging technologies, ELISA technologies and multiplexing techniques and applications desired.
- Familiarity with Bio-Rad instruments a plus.
